LA POLO

After an exciting match, Chirag Parekh sat in conversation with LA POLO for a quick candid interview.

LA POLO:

Everyone has heard you say that Polo brought speed to your business. How exactly did that happen and even more stark is the fact that how did Polo come in the way of a businessman?

CHIRAG PAREKH: For me, Polo has changed my life. The

sport needs a lot of guts to get on the horse and then Polo all in all is a different game. You need a lot of courage, and it all comes from the core. With Polo you develop guts, power and courage. I think it absolutely relates to the business side, because then you start taking risk in business too. Polo brings a lot of energy in me, it makes me a very sporty young man that is bound to take challenges everywhere.

# THE COMING OF THE EYEGLASSES

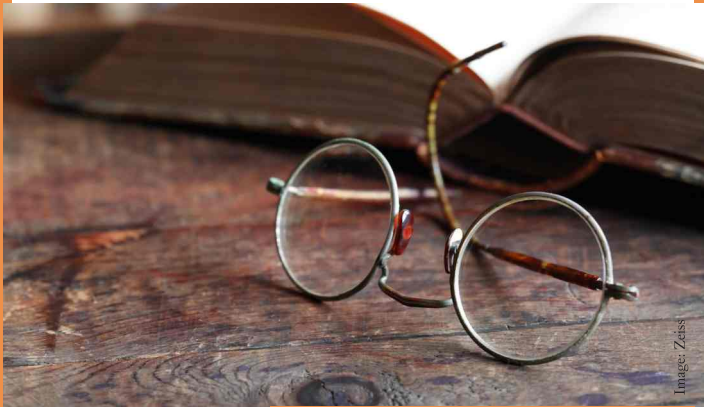

Image: Zeiss

+ IN ANCIENT ROME, THE EMPEROR NERO WOULD HOLD A POLISHED EMERALD IN FRONT OF HIS EYES TO REDUCE THE SUN'S GLARE WHILE HE WATCHED GLADIATORS FIGHT.

Glasses have come a long way in the last 700 years. The first mention of eyeglasses in roughly the format we know them today, two-lens corrective frames, in historical texts was in the late 13th century in Italy. Cultures around the world had been experimenting with optics for centuries prior, and the 11th-century Arabic text of the Book of Optics laid the foundation for the creation of modern eyeglasses. By the turn of the 14th century, Venice had established a guild to regulate eyeglasses. This early eyewear employed convex lenses to magnify a subject. The earliest known pair of dual-lens glasses ever discovered was dated to 1400 in Germany.
